

# Landscape Seasons

As we continue with our landscaping unit we talk about choosing plants for seasons. As we look around us we start to see seasonal changes. The goal this week is to notice those changes and what they are doing for the landscape.

**Directions:**

1. Go outside 3 times this week.
2. Notice seasonal changes to different plants. (Grasses, Trees, Bushes, Bulbs, etc)
3. Write a short 1-2 sentence description or list describer words.
4. Draw out what you see, smell or feel.

**Example:**

Observation #1: 3/20/2020

Time: 5:30PM

Location: My backyard

- I see that the grass is starting to turn green in some spots, new growth has begun.
- I also see that the tulips are beginning to emerge.
